

Do your thing at NT-ware!

We are an innovation partner and integral member of the Canon Group. Our specialists around the world develop state-of-the-art software for our print and scan management operations located near the German city of Osnabrück. These developments are made from scratch through constant dialog with colleagues in New York, Singapore, and Tokyo. With our highly flexible working environment and our pioneering approaches regarding time, space, and equipment, we are a fount of ideas for newer and better solutions. Come and join our team in Bad Iburg, Germany.

SENIOR LINUX SYSTEM SPECIALIST (M/F/D)

This sounds amazing!

Do you have several years of experience in providing Linux-based infrastructures in corporate contexts? And are you eager to implement and maintain the Linux portion of our infrastructure (which currently makes up the majority of our IT footprint and is continuing to grow)? Are you a true pro when it comes to integrating Linux systems with Active Directory and controlling Linux environments using Puppet? And are you as adept at using Atlassian products (JIRA, Confluence) and Git repositories as you are at Bash scripting and deploying and maintaining Docker systems?

Of course!

Experience? Is something I'd like to gain with NT-ware.

Are you at the beginning of your professional career? We are always on the lookout for new talents and would therefore love to receive your on-spec application!

At NT-ware, you'll meet a friendly technical and support team made up of delightfully easy-going people from over 35 nations. At each of our locations, we put our heads together to develop, test, and implement exciting ideas. By the way: What is your English like?

I love it!

English is not really my strong point.

With us, you can go all out.

- You'll install and configure all components of our Linux systems.
- In your role as network specialist, you'll look after our point-to-point and point-to-site VPN connections using OpenVPN and IPSec. You'll also maintain large iptables rule sets and facilitate complex routing across multiple company sites.
- You'll be responsible for Linux administration tasks, maintenance, and backups, and ensure effective troubleshooting for the company's daily operations.
- What's more, you'll maintain Linux file shares (Samba/NFS), ensure OpenSSL certification, and closely monitor network security during system maintenance work.

No worries. We offer in-house language courses taught by certified instructors so you can quickly brush up on your English skills.

That sounds perfect. Is there any information about the perks and benefits?

I don't think this is the right job for me :(

That's too bad. Good luck on your job search!

Perks and benefits? Of course. We offer a super-flexible, highly modern, and well-equipped workspace with a company bonus plan, opportunities for continued professional development, driver safety training, work bicycle rentals, gym partnerships, work from home, electric height-adjustable desks if desired, and much more... Convinced?

Are you looking for more good reasons to join NT-ware? You can find more information about our corporate culture at www.nt-ware.com.

Definitely!

Does this sound like you?
