

# Environmental Policy

NT-ware's environmental policy supports Canon Europe's Environmental Charter. Our policy reflects our business operations and their direct and indirect impacts on the environment. Our activities as a software development company are guided by the following environmental principles:

- 1 Inventing and creating products that enable businesses to work more efficiently and securely.
- 2 Being mindful of the environmental impact of our activities and striving to lessen these impacts by constantly improving our business processes.
- 3 Optimizing efficiency of resources and reducing pollution in all areas of our business operations.

**These principles are supported by the following actions:**

- Establishing and operating an environmental management system which helps us to measure and reduce the environmental impact of our business operations.
- Developing and promoting product functionality which helps to measure and reduce the environmental impacts of business processes.
- Encouraging recycling of both our products and packaging at the end of their lifespan.
- Promoting environmental awareness among our employees.
- Operating in accordance with German environmental legislation.
- Actively pursuing energy and resource conservation.
